

## The Fara Boiler Pellet Stove

**BLACK**

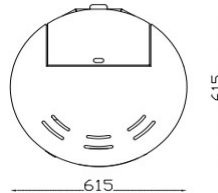

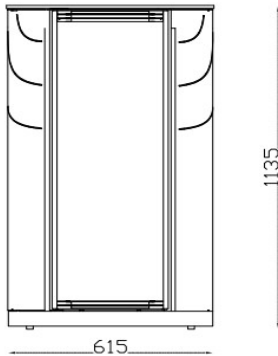

**WHITE**

**RED**

The Fara thermo stove by CTL is a completely round stove with a diameter of 615mm, powerful and reliable with programmable and easy to use controls.

The front door is entirely black and lets the fire shine through when it is lit, hiding the combustion chamber when it is off. The Fara is a hydro-ventilated pellet thermo-stove with adjustable and excludable hot air, this air is generated from the lower rear of the stove, crossing the top of the boiler allowing the maximum amount of heat to the room

### Features

Ash drawer  
 Display with programmable functions  
 Glass Cleaning Air Flow (Air Curtain)  
 Room Fan

Cast iron brazier  
 Air Flow Management  
 Magic Glass Door  
 Ceramic Ignition plug

Option for WiFi available
